Internal Brakes Effortless Steering Superb Roadability

POSITIVE BRAKING

IT'S no effort at all to drive Pontiac. It has the Big SIX ease of control for which motorists used to pay double the price of Pontiac Six. Built low, equipped with four Lovejoy Shock Absorbers... Pontiac holds the road surely and easily at all speeds.

EASY STEERING

Steering in the Pontiac Big Six, has been robbed of all strain and effort. You can relax at the wheel. And, when you want to stop, you have the comforting assurance of the finest, four-wheel, internal-expanding braking system on any car within hundreds of dollars of Pontiac price... and an independent emergency brake that operates at rear of the transmission.

HUGS THE ROAD

Compare Pontiac Big Six, point by point, with ANY other car in its price-range. Check it for beauty, performance, comfort, ease of control, dependability. And remember, Pontiac is a long-life car, always sure of a high resale value, even after years of trouble-free service.

Grain Grading Good.

Owing to the earlier threshing season this year, the local elevators have commenced seasonal operations at an earlier date, also, with the Pool elevator apparently in the lead for volume grain receiving. Mason Leader is on the job with his three-ton truck, hauling from the machines to the elevator. Among those who have had their grain hauled in to town is Mr. W. J. Davidson, whose Garnet wheat which weighs 63 lbs. to the bushel, shows as good a sample as has been seen here. "W. J." expects it to grade No. 2.

Awaiting the 16th Morn.

The local Nimrods are eagerly awaiting the dawn of Monday next, Sept. the 16th, when the duck and geese season will be ushered in with the usual fusillade. While not noticing ducks in very large numbers around here this fall, yet reports from outside districts show that there is a good sprinkling of them in the out-of-the-way places and in the little bays on the lakes. The dry season and the consequent drying up of sloughs, has caused an earlier migration of the ducks to the larger bodies of water, particularly where there is feed in adjacent fields.

60,000 Motorists Unlicensed.

Motorists who have neglected thus far to secure drivers' licenses are likely to be checked up any day now and asked to explain why. The Police throuth: the province have been instructed to make a survey of the situation. Government authorities being now of the opinion that sufficient time has now been given for the automobiling public, and particularly town and city people, to get their licenses. Some convictions in the near future for this neglect are not improbable.

Open Season for Chicken Thieves.

The epidemic of chicken stealing which had been epidemic hereabouts two years ago, has broken out again apparently, as several of such cases have been reported to the Police, and possibly a number which have not been so reported. Among the losers are Councillor Lattimer, at Leasowe, who had about 60 stolen; and Carl Goetz, north of Stony, who had a couple of dozen feathered beauties removed.

As those who have suffered know, the usual procedure is to visit a farm, purchase a few birds, get a line up on the layout, and pay a return visit in the dark of the moon, when it's easy for the chicken fanatics to get what they're after.

Britain and Canada

Canada is honored at the present time by having among its visitors three notable British statesmen, Hon. J. H. Thomas, Minister of Employment in the Ramsay MacDonald Government; Hon. Winston S. Churchill, former Chancellor of the Exchequer, and Mr. Amery, former Minister for the Dominions. Mr. Churchill and Mr. Amery are in Canada on holiday, but they are none the less closely studying conditions and ascertaining the sentiment of this country in regard to vital questions of Empire policy such as immigration, trade and commerce, and the possibilities of closer relationships in matters for the general advancement of both Mother Country and this Dominion.

On the other hand, Mr. Thomas' visit to Canada is in his official capacity as Minister of Employment with the object of endeavoring to find out in what ways Canada can assist in solving the serious unemployment problem in Britain without doing injury to itself, and, having discovered, or evolved, ways and means to accomplish this object, to secure the co-operation of the Canadian Government and the Canadian people in carrying them into effect.

Fortunately, the first impression created by Mr. Thomas' mission has been removed. As the minister charged with the task of solving the unemployment problem in Britain, it was felt that Mr. Thomas was coming to Canada with the idea of developing some immigration policy whereby large numbers of British unemployed would be transferred to this Dominion. Anxious as Canada may be to have a large proportion of its incoming settlers of British birth, this Dominion is not prepared to have thousands of men dumped into the country solely because they cannot find work at home and who have no training or aptitude for life in this land. Mr. Thomas has made it abundantly clear that he has no such intention; on the contrary, Mr. Thomas declares: "It is not my aim to solve my unemployment problem by creating one for you." Unemployment and immigration are, he says, two quite separate and distinct problems and should be tackled as such.

Then what is Mr. Thomas' proposal to Canada? It is simple, clear-cut, workable, and one that should find favor with the sympathies and support of the people of Canada. In a word it is that our large Canadian corporations, and our people generally, should, when making purchases by British-made goods and articles, if such are not made in Canada, in preference to buying from any other country. He has asked the Dominion Government to give encouragement and support to such a policy. He has sat down in conference with the heads of the Canadian Pacific and Canadian National Railways and asked them to follow such a policy. He has said to the officials of the Canadian Wheat Pool: "Britain is the largest purchaser of your wheat. We are your best customer, just as we are Canada's best customer. Thus, when you require machinery or other things which Canada itself does not manufacture and cannot supply, we ask you to buy from us, rather than from others." This should appeal to the people of Canada as good business. It is a self-respecting proposal for both parties to it. For example, Mr. Thomas points out that Canada imports over 16,000,000 tons of coal from the United States. He wants, and says he is going to get, some of that coal business for Britain—Canada's best customer—and thereby assist the coal mining industry of the Old Land and supply work for some of the thousands of unemployed miners there, as well as cargoes for British boats, thus providing employment for British deck hands, sailors, and all and sundry having to do with the business of shipping.

Such a policy will strike a responsive chord with the people of Western Canada, who are not particularly favourable to any policy of restrictive tariffs, or other forms of restraint on trade, and who firmly believe that the proper policy for this Dominion to pursue is to offer tariff action by other countries against Canada by further reducing tariffs on British goods and thereby assisting to substitute British-made goods for those of other countries.

The success of such a policy lies largely with the individual Canadian citizen. He can make it a success by stipulating when making any purchases that, first, he must have an article made in Canada, and, if that cannot be obtained, second, that it be British-made. Importers, wholesalers, distributors, retailers, will quickly adjust their stocks to comply with the popular demand.

Leaving all sentiment aside, it is good business for the people of Canada to support and buy from their best customer. The more we buy from Britain, the more Britain can afford to buy from us.

An Indian spider's web, only six inches wide, was found to contain over 41,000 meshes.

Stop Sneezing

Nip that cold in the bud with Minard's Heat and Inhale.

W. N. U. 1902

Southern Alberta Beet Crop

"The Southern Alberta beet crop, from present indications, especially from the Raymond District, promises to be the largest tonnage on record," says the Lethbridge Herald, "despite the reduction in acreage due to loss from heavy rains and floods during the early spring. The remarkable growth helps to offset the difference, and the beets thrived under the oppressive heat of midsummer."

A new type of lifeboat, recently tested in British waters, holds 300 passengers and is equipped with radio.

Any job is easy when you like it and hard when you dislike it.

Was Victim Of Glacier

Body Of Austrian Recovered After Eighty-Three Years

Eighty-three years ago, Norbert Matterberger, at the time 32 years old, husband of Magda, and father of Frans Otto, failed to return to his cottage, in the village of Kals, Austria, one day from the woods, where he won his living hunting game. A rescue party from the village decided he had been caught in an avalanche of ice.

Recently Matterberger came home just as he left that day in 1846. The glacier had given up its prey. Although clean shaven, according to family records, when he left, he had a two-inch beard when a party of hunters found him on the edge of the glacier. The body, clothes, and weapons were in a perfect state of preservation.

Frans Matterberger is now 88. His father was buried at Kals, while grandchildren and great-grandchildren at his grave.

WHAT OUR GIRLS NEED

When Languid, Anaemic and Feeling Run Down

When a girl grows languid, dull and irritable, when her color fades and she becomes pale, you may be sure that the cause is anaemia, or impoverished blood. The bright, red color of the blood is caused by the presence in it of millions of tiny red corpuscles. It is these tiny bodies that carry nourishment from the blood to the tissues. They also cause the glow of health in cheeks and lips. When a girl's blood is deficient in these red corpuscles her body is under-nourished, her nerves starved, and there is serious danger of a decline. What is needed is an improvement in the quality of the blood, and it is a scientific fact that a course of Dr. Williams' Pink Pills will so enrich and purify the blood that all traces of anaemia and its accompanying weaknesses will disappear. As an evidence of the value of Dr. Williams' Pink Pills in cases of this kind, Mrs. John Flinn, Howland Station, P.E.I., says:—"I am glad to take this opportunity of recommending Dr. Williams' Pink Pills. My daughter was in a badly run down condition, very pale, nervous and much under weight. We tried several medicines, but to no avail, it did not seem to do her any good, so I decided to give her Dr. Williams' Pink Pills. Almost from the start she began to improve, and after the use of a few boxes she had gained weight, her appetite improved and she had a better color in her cheeks—in fact she had fully regained her former good health. I would advise every mother of young girls to give them Dr. Williams' Pink Pills at the first sign of an anaemic condition." You can get these pills from any medicine dealer or by mail at 50c. a box. The Dr. Williams' Medicine Co., Brockville, Ont.

Germany, the United States, the United Kingdom and France together, exported \$800,000 worth of chemicals and allied products in 1928.

Worms in children work havoc. These pests attack the tender lining of the intestines and if left to pursue their ravages undisturbed, will ultimately perforate the wall, because the worms are of the hook variety, thus cling to and feed upon the interior surfaces. Miller's Worm Powder will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Chinese writers state that in the third century B.C., China had wide highways lined with shade trees spaced at intervals of thirty feet.

Cramps Diarrhoea Pains in Stomach

Mr. Roy Lighthall, Milford, Ont., writes:—"I became very ill; lost my appetite, had cramps, diarrhoea, and severe pains in my stomach."

"I purchased a bottle of and before I had taken half of it I was completely relieved, and have had no symptoms of the trouble since."

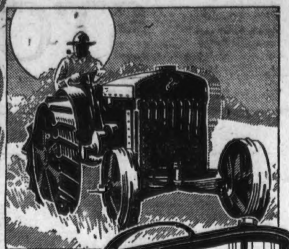

"I cannot praise 'The Extract' too highly, and will never be without a bottle of it in the house."

"It is pleasant to take and acts very quickly."

"My brother had the same experience with it as I had."

New Company Organized

Will Manufacture Briquettes From Dried Coal In Souris District

The Canadian Coal Briquettes & Power, Ltd., has been organized by a number of prominent financiers and coal men in western Canada to manufacture briquettes from the dried raw coal of the Souris District of southern Saskatchewan. Dried lignite coal and powdered fuel will also be manufactured. The company, it is stated, owns 800 acres of coal in the Souris District with an estimated tonnage of 8,000,000 tons.

Miss Oldriver: If I should lose all my money would you love me just the same?
Mr. Roadrunner: Just the same, my dear, only I'd be so busy earning my living you wouldn't be able to notice it.

Still that corn with Minard's Liniment.

World Harvest Larger

Wheat Acreage In Many Countries Increased In Last Year

Present indications are that the world acreage of wheat to be harvested in the season 1929-30 will be larger than that of last year. The 1929 wheat acreage in 21 countries is estimated to be five million acres larger than in 1928. Areas reported in all European countries total 58,562,000 acres, an increase of 1.4 per cent. over last year.

Vision of Mineral Wealth of Western Provinces Is Seen From Initial Development

Speaking of the immense possibilities of the northern parts of the provinces of Quebec, Ontario, Manitoba and Saskatchewan in the production of mineral wealth, Dr. C. V. Corliss, in an address to the Winnipeg Board of Trade, recently stated that Canada would never be appreciated until the people learned to turn their eyes to the north, for it is there that they will find the largest quantities of that without which the progress of civilization would be sadly hampered, if not halted altogether, namely minerals.

Minerals form the basis of progress today, for the material side of our modern scientific civilization depends for its progress on man's increasing knowledge and skill in their use. And so the strength and economic success of modern nations are largely conditioned on their successful exploitation of mineral wealth. The world's growth in population may be controlled by its biotic resources, man must be fed and clothed before he may advance, but its material progress is measured rather by man's growing success in shaping its mineral resources into forms to suit his own purpose.

With the opening of the vast mineral-producing areas in the northern part of Manitoba and Saskatchewan, though the work has only been begun, comes a partial realization of the potential wealth contained in these two provinces. In districts hitherto thought to be of little value beyond the timber and fur. The discovery of the presence of mineral-bearing formations in the rock gives promise of another mining area such as has been developed in Northern Ontario.

Nothing could bring greater benefit to the agricultural industry of the West than the development of a flourishing mineral industry, with its large sums of circulating capital, energizing the economic system in all directions. Such sound development would provide a ready near-by demand for the products of the farmer, who is now so seriously hampered both by the remoteness of his market and by the limited variety of those products which can stand the present long transportation cost.

Nor would anything quicken the activities of western towns and cities more than the opportunity to supply the many other needs of a flourishing mineral industry and of its numerous workmen and staffs, who, unlike the farmer must purchase one hundred per cent of their daily needs. This country's greatest economic need today is more balanced industries, the creation of internal exchange of goods by the development of more varied industries, a happy condition which will never be fully enjoyed until there is set in motion a long chain of industries having their starting point in the minerals of the earth's crust.

As in the case of Northern Ontario, some of whose greatest mineral deposits were discovered only when the railways were being pushed through the wilderness railway system in the northern parts of Manitoba and Saskatchewan is leading to the discovery of still further deposits of potential wealth, some of which are already being converted into actual cash by those in charge of the development. Then, too, the more the lines of steel are pushed ahead in this country, the

more of it is made readily accessible to the prospector and still more accessible to that just as important person, or persons, the promoter who develops what the prospector has found.

Before the end of 1928 an eighty-eight mile branch railway, which was essential for the development of the area, was completed from the Hudson Bay Railway. The mine plant under course of construction and which will take about four years to complete, will include flotation mill, with cyanide amen, copper smelter and electrolytic zinc plant. It is expected to mine and treat 3,000 tons of ore a day. Hydro-electric plants and transmission lines will also be erected and it has been announced that the Island Falls site on Churchill River will be utilized.

In 1915 on the north-west arm of Schist Lake, and about four miles south-east of Flin Flon Lake another discovery was made. A year later diamond drilling disclosed an ore body of about 25,000 tons of massive chalcopyrite, averaging about 20 per cent. copper with additional gold and silver values of \$5 a ton, and about 180,000 tons of low-grade copper-zinc sulphide ore. Very soon after the discovery, this property was taken over by a company. During the war years this company took advantage of the high price of copper and the richest part of the ore was accordingly mined and shipped to smelter at Trail, British Columbia, for treatment. Although involving unusual transportation costs, 25,000 tons were moved from 1917 to 1920 inclusive. The value of this copper exceeded \$2,500,000 and the recovered gold and silver approached a large figure.

Prospectors in 1914, working eastward from Amisk Lake and westward from Hudson Bay Railway, found many indications of ore gold in quartz veins occurring on the shores of Wepukio Lake, also known as Herb Lake. Hundreds of claims were staked and considerable development resulted. Number of companies were defined.

Many important discoveries of minerals in all parts of this great belt have followed the spreading out of the prospectors and scarcely a day goes by without a new discovery. One of the biggest or possibly the biggest ore body yet found, is the Sherritt-Gordon copper-zinc deposit on Cold Lake, otherwise known as Klasing Lake, about forty miles north-east of Flin Flon Lake.

Development to date has definitely placed this property in the big mine class and an off-shoot of the Flin Flon branch railway is expected to be constructed during this year from Cranberry Portage to the mine, a distance of about forty-two miles. Arrangements for the construction of a 1,500 ton concentrator were recently announced which, it is expected, will be ready for operation by January, 1931. Production from the Sherritt-Gordon is only a matter of time, a strong company having been formed to carry out the developments.

So the justified rush to the North has opened up an area which seeks the hand of friendship from the South.

China Planning Gunboats

The Observer's Shanghai correspondent, in London, reports that British firms are negotiating with the Chinese Government for the construction of gunboats costing several millions of dollars. Although the negotiations have not been completed, it has been arranged for eight Chinese cadets to go to Great Britain to receive instruction in naval architecture.

Planning Another Flight

Another Graf Zeppelin flight to America is planned for October, according to a Friedrichshafen despatch to the Telegraph. The despatch added that the great dirigible was expected to return to Friedrichshafen on Sept. 10.

He: "Don't go. You are leaving me entirely without reason."
She: "I always leave things as I find them."

"Shall we try what honest men do in our business?"
"No, I will have no more innovations."—Lustige Kiste Leipzig.

W. N. H. 202

Canada Urged To Look After Forests

Method Is Criticized By Editor Of Forest Journal

A strong indictment of the forestry methods used in Canada is made in an issue of the "Empire Forestry Journal" by Fraser Story, the editor. After referring to the ever-growing needs of the Empire for soft woods, the writer points out the magnificent white pine forests of Eastern Canada are gone and the lumber industry is now concentrating on the great forest of the West. The treatment of old stands and the neglect and abuse of young growth, in spite of the efforts of the forestry service, the absence of care in the abstraction of produce and the large percentage of waste come as a shock to European forestry," he writes.

"Generally speaking," he continues, "no effort is made to restock cleared areas with profitable species. During logging operations all valuable conifers are removed while fire nearly always breaks out in the debris and burns any that remain."

"Valuable coniferous forests are succeeded by practically worthless trees, which are in their nature weeds. What makes matters worse is the tendency to cut down young trees for quick sale."

"The lack of regard for future crops seems to be principally due to thoughtlessness. Canada will, no doubt, always have a sufficient supply of soft woods to satisfy her own needs, but as an Empire supply she is a failing source."

Will Develop Amber Deposits

Amber and Ochre Beds In Northern Manitoba To Be Worked

A new branch of mining in northern Manitoba is a likelihood next spring with the announcement that a syndicate will develop the ochre and amber deposits at Cedar Lake. The company is known as the Chartrand Syndicate, and operations are expected to start this winter.

Staking of properties will be completed by this fall. Adequate finances are in sight for the development, it is stated by officials of the company.

Delay in operations has been caused by the fact that there are no regulations governing the dredging of amber. It is understood that the syndicate is progressing satisfactorily in its negotiations with the authorities and that dredging licenses will be granted.

Surveys have shown that the major part of the bed of Cedar Lake is composed of an amber deposit, the result of the decay of an ancient forest. A paint and varnish firm in the United States has been investigating the possibilities of the ochre deposit, and a deal for the sale of the output in northern Manitoba is probable.

That Kind Of A Loan

"A Kathleen Mavourneen loan" questioned a judge in an Irish court. "What in the world is that?" "That's what we call some loans in our parts," the witness replied. "They are the 7t may be for years and it may be for ever sort."

Plans Being Formulated For Canada's Participation In The Antwerp International Exhibition

Air Mail For North

Regular Service To Be Established In Northern Alberta

A notable extension to Canada's rapidly growing air mail service will go into operation early in November, when regular air mail service will be inaugurated by Postmaster General P. J. Yeniot, between Fort McMurray, Alberta, and Aklavik, N.W.T., near the mouth of the Mackenzie River.

This route, which will almost parallel the historic fur traders' trail for nearly 2,000 miles north and northeast, along the Athabasca, Slave and Mackenzie Rivers, penetrates farther north than any other regular air mail service in the world and brings a remote but important region of Canada's vast north land close to the main arteries of traffic, also greatly increasing the frequency of communication. The winter transportation difficulties in this area have been such that it has been necessary to depend chiefly upon dog teams for mail services. The coming of the mail plane reduces days to hours and confers an inestimable benefit on the inhabitants. There will be 14 points of call on the route, including Fort Resolution, Fort Providence, Fort Good Hope and Aklavik itself.

Sweep Of Prizes

Carload Of Manitoba Livestock Sets A Record At Western Fairs

The greatest sweep of prizes ever made by a carload of livestock from Manitoba, is the record set by Alex McPhail and Herb Clark, of Brandon, in their showing of swine over the Western Canada circuit of exhibitions. Concluding their trip at Regina, the local exhibitors found themselves in possession of 83 prizes. Forty-three animals were included in their showing, and at Calgary, Edmonton, Saskatoon, Regina and Brandon, they met keen competition but were successful in practically every event they entered.

Combines Used In B.C.

While "combines" for harvesting are common enough on the Prairies, the first one to be used in British Columbia will be in the fields of the L and A Ranch this season, between Armstrong and Vernon. Considerable acreage was sown to wheat this year, and being irrigated land it has not suffered from the drought and will likely yield from 45 to 50 bushels to the acre.

A Lonely Town

The loneliest village in England is in Oxfordshire. This town is only five miles from Oxford, yet its many agricultural inhabitants have never seen a train and few have attempted a tortuous trip into civilization. Because of its isolation, supplies cost the local villagers much more than they should.

Win Scholarships

Canadian Pacific Railway scholarships covering five years' tuition at McGill University, have been awarded to C. P. Sturdee (left), son of H. F. L. Sturdee, assistant general passenger agent; and William F. Dunlop, son of John Dunlop, in the pension department of the railway. These young men have both done brilliant work in their respective school careers and closed them by making the highest average in the matriculation examination for entrance to the university. As minor sons of C.P.R. employees they won the right to the scholarships awarded them.

Plans are now being formulated for Canada's participation on a princely scale in the Antwerp International Trade Exhibition of 1930, which will be the fourth occasion on which Canada has taken part in a leading Belgian Exhibition.

The three previous occasions were at Liege, in 1905, Brussels, in 1910, and Ghent, in 1913. Until recently it was thought that Canada would take a space in the British pavilion at Antwerp, but so important is Canada's growing trade on the Continent becoming that the Canadian Government decided on participation separate from the British exhibit and in an entirely Canadian Pavilion.

This has been designed by J. O. Turcotte, Canadian Government Exhibition Commissioner, and will take the form of a building 200 feet by 80 feet in the modern style, advantageously situated between the French Section and the Amusement Park. The building will be constructed of steel and reinforced concrete, with special soft roof lighting.

The entire decoration, which is on a most lavish scale, is being prepared at the Canadian Government Exhibition warehouse at Hampstead, and consists of continuous transparent frieze, nearly 500 feet long, with a special illuminated background portraying Canada's productive resources from Atlantic to Pacific. Visitors will be able to take in at a single eye glance the products and methods of Canada's farms, fisheries, mines, forests, factories and mills.

All advertising matter will be published in French, Flemish and English, and all efforts will be centred on presenting Canadian products as a whole and not by individual provinces.

All Accredited Stock

Great Demand At Vegreville Hatcheries For Baby Chicks

Ninety thousand baby chicks were sold from the Alberta Hatcheries, Ltd., at Vegreville this year, all of them from eggs selected from accredited flocks. This enterprise was started on capital supplied by about twenty local men and is a purely commercial hatchery. In addition to this they brought in baby chicks from British Columbia to fill orders they were not in a position to supply. The capacity of the hatcheries is greater than the 90,000 produced this year and with the perfecting of one of their incubators, a home-made product with a 100,000 egg capacity, and the development of their markets, it is probable that the business will develop greatly during the next season.

At present in addition to the 100,000-egg incubator, there is also a 15,000-egg electric incubator. Will J. Cowie is operator and manager and the district agriculturist F. H. Newcombe has been an active agent from the beginning of the enterprise.

The scheme started as a result of dissatisfaction over the different standards in judging birds and an increasing feeling that the poultry business should be raised to a more business-like proposition having its proper place in farm activities. This could not be done until farm flocks were increased in number and improved in quality. There was little incentive to do this with a standard of perfection as one objective and standard of production as a counter objective or basis.

"Do people often fall down this abyss, guide?"
"No, sir, never more than once."—Lustige Kiste Zeitung, Cologne.

WORLD HAPPENINGS BRIEFLY TOLD

Regina was named as the scene of the 1930 convention of the Trades and Labor Congress of Canada. The western city defeated Hamilton by 109 to 75 for the honor.

Mrs. Jessie Campbell Ewart, wife of John S. Ewart, K.C., widely known authority on constitutional law and history, died at her Ottawa residence recently.

Montreal proper has now a population of 1,071,057, according to Lovell's Montreal Directory, the 47th volume of which is about to be published. The population of Greater Montreal is 1,224,059.

Vilhjalmur Stefansson, famous Arctic explorer declares that the northern air route to Europe is the only practical one to develop and predicts that within 10 years' time there will be one day mail service from Winnipeg to London over the northern end of the world.

The Graf Zeppelin completed its 20,000 mile flight around the world in 21 days 7 hours and 54 minutes elapsed time. Actually flying time of the Graf was 11 days 23 hours and 14 minutes, beating the time of 15 days and six hours made by the United States army world flyers in 1924.

IS THERE A BABY IN YOUR HOME

Is there a baby or young children in your home? If there is you should not be without a box of Baby's Own Tablets. Childhood ailments come quickly and means should always be at hand to promptly fight them. Baby's Own Tablets are the ideal home remedy. They regulate the bowels; sweeten the stomach; banish constipation and indigestion; break up colds and simple fevers—in fact they relieve all the minor ills of little ones. Concerning them Mrs. Mabel Cabotte, Makamiki, Que., writes: "Baby's Own Tablets are the best remedy in the world for little ones. My baby suffered terribly from indigestion and vomiting, but the Tablets soon set her right and now she is in perfect health." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"Did you cancel all my engagements, as I told you, Smithers?" "Yes, but Lady Millicent didn't take it very well. She says you were to marry her next Monday!"

Minard's Liniment—Used for 50 Years.

The ex-Kaiser is the richest German in the world. He found a way to make Germany pay before the awes plan was ever heard of.

A butterfly in flight beats its wings nine times a second.

A Great Mathematician

Professors Amazed By Rapid Mental Calculation Of Young Russian Woman

The world's most marvellous woman mathematician has been discovered in the person of Nina Giagioliva, 22 years old, who does in her mind, in from two to 20 seconds, mathematical problems which require hours of experts to do, in the ordinary way, with pencil and paper.

This wonder woman has been discovered after a wide survey, and scientists are amazed at her lightning-like mental calculations. Before a commission consisting of Professor Kozelnikoff and Professor Cheljevsky, mathematicians; Kofinsky, the engineer, and Dr. Kiselef, a physician, Miss Giagioliva with apparently little effort, extracted the root in the ninth degree of numbers with as many as 20 digits. Squaring and cubing numbers of 9 or 10 digits seemed no harder to her than the multiplication table to ordinary humans.

Her memory is remarkable and she can repeat, having heard them only once, long lists of words in languages she does not know. The commission pronounce this woman of Russian birth, greater than Arago or other prodigies on record.

Winnipeg Newspaper Union

UNIQUE SPORTS TYPE

It's slender, trim and wearable. It never suggests wrapped treatment, so entirely smart and new. Style No. 560 is a boon to the woman with a stout figure. It conceals overweighing without a tell-tale. Just see how the surplus closing bodice with shawl collar carries the line down to straight closing of skirt to give the figure length. At each side of front, inverted plait add necessary width to hem. They are topped by pointer patch pockets with envelope flaps. The back is perfectly straight. It is a model that adapts itself beautifully to all the smart cotton fabrics as printed pique in red and white pin dots with white pique contrast as sketched. Yellow sportswear linen, peach shantung with white, green and white checked gingham with green organdy, sky-blue silk broadcloth self-trimmed, orchid and white gingham, check in cotton voile with white organdy and shell-pink washable flat silk crepe. It is designed in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust, measure. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

IT'S folly to suffer long from neuritis, neuralgia, or headaches when relief is swift and sure, thanks to Aspirin. For 28 years the medical profession has recommended it. It does not affect the heart. Take it for colds, rheumatism, sciatica, lumbago. Gargle it for a sore throat or tonsillitis. Proven directions for its many uses, in every package. Every drug store today has genuine Aspirin which is readily identified by the name on the box and the Bayer cross on every tablet.

Aspirin is a Trademark Registered in Canada

Aviators Had Hard Time

Had Almost Lost Hope When Rescued In Far North

After living eight days on berries between St. John's Lake and Norway House, where they made a forced landing, R. Marshall and S. Harrison, Canadian Air Force aviators, are now recovering at Norway House. They were rescued by an air force plane recently when they had almost given up hope.

Their clothing was in tatters and they were painfully weak when found. They were on fire patrol when the motor stalled and landed on the lake, and struggled unsuccessfully the first day in an effort to make repairs. They remained near the machine and on the eighth day their frantic signals attracted another plane to their rescue.

Like a Grip At The Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Air Force aviators, are now recovering at Norway House. They were rescued by an air force plane recently when they had almost given up hope.

Army Fights Locusts

Sixty-Five Tons Destroyed By People In Bulgaria

Every man and woman between the ages of 10 and 80 was recently mobilized by the government of Bulgaria to fight an extraordinary plague of locusts, which were destroying crops in the Hasovo District, of southern Bulgaria. Fire, smoke, lye and oil were successfully used in combating the pests, but more than 65 tons of the locusts were destroyed before their depredations were finally terminated.

Sores. Flea Before It—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Eucalyptic Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

France has seven million cyclists. It is the most popular sport in that country. An annual distance bike race is one of the big sporting events each year.

Minard's Liniment—The King of Pain.

SUNDAY SCHOOL LESSON

SEPTEMBER 15

TEACHING THE LAW OF GOD

Golden Text: "The opening of Thy words giveth light."—Psalm 119:136. Lesson: Nehemiah 8:1-18. Devotional Reading: Psalm 119: 97-104.

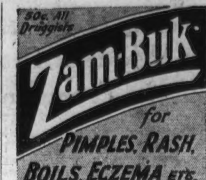

Explanations and Comments

The Reading Of The Law By Ezra, verse 1-8. The first day of the seventh month is the day which from the time of Alexander the Great, has been celebrated by the Jews as the Feast of Trumpets, which was observed with special rites: see Lev. 23:24, 25; Num. 29:1-6. In the year 445 B.C., on this day (Neh. 7:73), the people of Jerusalem assembled in the broad place before the water gate, and Ezra, the priest and scribe, read to them the Book of the Law of Moses. "In Ezra the title of 'scribe' came to mean the man of the book." It is evident that the scribes were the nearest originals of the clergy of later times.—Dean Stanley. Exactly to what the phrase, The Book of the Law of Moses, refers is a disputed question among scholars. The entire Pentateuch, some believe; the legislative portions only of the Pentateuch, others maintain.

Ezra stood upon a wooden platform above the people and was aided by thirteen Levites, who gave the sense, so that the people understood the reading. Evidently Ezra read the Law sentence by sentence, and briefly expounded it, and then the Levites made the explanation clear to the people. Men, women, and children, old enough to understand, listened attentively to the reading from early morning until midday. On account of the heat they had their customary rest during the noon hour. To the reading the people responded with Amen. Amen (So be it), with a lifting up of the hands, evidently with the palms upward in supplication for the divine blessing, and then they bowed their heads and worshipped Jehovah with their faces to the ground.

The Effect Of The Reading Of The Law, verse 9. "By Ezra's inspiration and under his guidance the Law was now for the first time put before the Jews and was conducted wholly in accordance with its precepts."—A. S. Penke.

Nehemiah the governor, Ezra the

priest, and the Levites said to the people: "This day is holy unto Jehovah your God: mourn not, nor weep." The day was holy because it was the day of the new moon and of the blowing of trumpets, and also because of the reading of the Law. The People Comforted, verses 10-12. "Go your way, eat the fat and drink the sweet," counselled Nehemiah using a proverbial expression meaning "Do not fast or mourn." "And send portions unto him for whom nothing is prepared."

Martha—I thought you told me that you wouldn't give away that secret I told you last night.

Madge—I didn't give it away. I exchanged it for another one and an ice cream soda.

Keep Your Farm Up-to-Date This Inexpensive Way

For Farm Homes

Faded or cracked walls and ceilings detract from the pleasure of farm life. Hundreds of farm owners, realizing this, have transformed their rooms into bright, colorful interiors by applying Gyproc over all the old, ugly surfaces—decorating. Remarkably attractive results are thus achieved at small cost. Every room becomes much more beautiful, livable and up-to-date.

Barns and Poultry Houses

Gyproc lined barns and poultry houses provide the best protection against fire, cold, heat and vermin that your stock can have. You can erect, strong, rigid Gyproc sheets within in short time and at little expense. After a few months you will be delighted with the improved health of your cattle and the increased laying capacity of your flock.

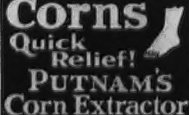

Utilizing Waste Space

Those musty, inaccessible waste spaces in your attic and basement! Why not convert them into extra rooms by erecting Gyproc walls and ceilings? You can have a playroom, a laundry room, a workshop, a special preserving closet or any other kind of room you wish.

For fast, economical, fire-proof construction on the farm there is nothing to equal Gyproc. Write us for information or see your nearest Gyproc dealer.

W. N. U. 1502

CANADA TAKES IMPORTANT STEP AT WORLD COURT

Geneva.—Canada is first among the British Dominions formally to declare adhesion to the optional clause of the world court, which provides for compulsory arbitration of international disputes.

Cheers rang through the Hall of Reformation when Senator Raoul Dandurand, leader of the Canadian delegation, made this declaration to the tenth assembly of the League of Nations. As he left the tribune, the premiers of both Great Britain and France joined with those offering congratulations.

From Senator Dandurand's statement it was clear the Canadian declaration did not come as a result of the recent discussion between delegates of the Dominions and Great Britain, or in consequence of Premier Ramsay MacDonald's similar declaration in behalf of Britain. Since the day Premier Mackenzie King, of Canada, sent the League his statement of March 10, 1925, that the Canadian Government was prepared to accept compulsory jurisdiction of the Court of International Justice in justifiable disputes, Canada has never faltered, Senator Dandurand emphasized.

Other dominions which are members of the League, likewise are preparing to make their declarations of adhesion, but there still remains the problem of reservations. In an endeavor to reach a common understanding the Dominion's representatives at present met the representatives of Britain, Australia and New Zealand, both have reservations. Canada, too, may have a reservation but it is unlikely it will be made as far reaching as those out of the Antipodes. The Irish Free State and South Africa, are understood to be like New Zealand, both have reservations. Among suggested reservations is a provision that compulsory reference to the international court would not apply to disputes between units of the British Commonwealth.

Big Aviation Event

Important Race For Aviators May Be Held In Canal

Toronto.—The rapid development of air navigation in Canada during the past few years promises to culminate in an aviation event in this country which, it is expected here, will rival in importance the race for the Schneider cup, now the international classic of Europe.

In view of the fact, as a result of the training received in the war, Canada numbers a considerable body of expert air navigators, and in view of the inevitable tendency towards international air meets, C. O. Stillman, president of the Imperial Oil Company, has made an informal announcement to the effect that his company contemplates a contribution of \$50,000 for the purpose of promoting an international race to be called "The Imperial Air Derby." This race will begin at some prominent flying center in the United States, and end at a Canadian field, on some date next year to be announced later.

The amount suggested as prizes is said to be far in excess of any inducement yet offered on this continent for an air race, and it is bound to attract the premier pilots and the most modern machines not only of Canada and the United States, but of other countries.

Java Sugar Arrives

Montreal.—With the first shipment of sugar from Java for Canada, in at least 20 years, the S.S. City Skene, arrived at Montreal with 73,000 bags from Tjilatjap, on the south coast of Java. The steamer made the journey in 48 days, sailing from Tjilatjap on July 13.

Commander Byrd Unveils Portrait Los Angeles, Calif.—A radio impulse by Commander Richard E. Byrd from his Antarctic camp at Little America blew an automobile horn and drew curtains from an enlarged picture of Byrd at the Seventh National Radio exposition here.

W. N. U. 1502

Western Air Mail

Service Expected To Commence About October First

Ottawa.—Inauguration of 1,250 miles of air mail service on the prairies is expected about Oct. 1, linking Winnipeg with Camrose, Alta., and thereby saving a day's time between the two points. G. H. Bunting, chief superintendent of the Dominion Air Mail Service, is now in the west making arrangements with the Western Canada Airways Company, of Winnipeg, while Hon. F. J. Veniot, postmaster-general, plans to go to Winnipeg to officiate at the formal opening of the service.

There are two routes planned for daily service, it was learned at the postmaster-general's department, the one from Winnipeg via Regina, Moose Jaw, Calgary and Camrose, and the other from Regina via Saskatoon and North Battleford to Edmonton.

Next year, it is indicated, the air mail service will likely be established across the Rockies to the Pacific Coast, giving practically a Dominion-wide air mail service from Rimouski in the Gulf of St. Lawrence and the arrival of ships from Europe.

Canada's National Parks

American Visitor Thinks Parks Of British Columbia Ahead Of Those In United States

Washington.—A trip through the Canadian Rocky Mountain National Park has convinced Mayor Ralph Bauer, of Lynn, Mass., that the management and upkeep of the British Columbia park is far ahead of the American National Parks, which he has also toured. He has written a letter to Senator David I. Walsh, to this effect, and the senator has asked the national park service to investigate.

Mayor Bauer stated that the Canadian roads were better made, and wider and were well oiled. There was no charge for admittance and the whole reservation seemed to be run for the people to whom it belongs rather than for concessionaires "in an effort to bleed the people to the last dollar possible."

Would Ask For Assurance

Premier MacDonald Should Have No Political Worries When He Visits States

London, Eng.—Discussing Premier Ramsay MacDonald's statement at Geneva, that the home parliamentary situation might possibly interfere with his trip to Washington, the Liberal newspaper, the Star, suggests editorially that opposition leaders give the Premier, before he leaves, the assurance that the exigencies he fears will not arise and that when he goes to Washington it will not be as the leader of the Labor Government, but as the spokesman of the whole nation on the vital issues concerned.

Speaking of the possibility of his trip, the Premier pointed out the difficulty of the leader of a party without a clear majority being out of the country while parliament was sitting.

Valuation Of Beech Property

Holdings Of Pioneer Homesteader At Fort Churchill Are Appraised

The Pass, Man.—The heirs of the late Capt. William Beech, pioneer homesteader at Fort Churchill, accompanied by their solicitors have arrived from the Hudson Bay port. The party had gone north to obtain an expert valuation of the property, which is now the subject of exchequer court proceedings.

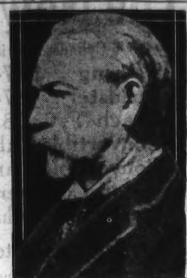

Nothing was divulged in regard to the valuation placed on the 2000 odd acres held by the Beech family at Churchill.

The case will come before a court hearing in Winnipeg about the end of the month.

Milk Shortage In Ontario

Toronto, Ont.—Dry weather may bring a milk shortage in Ontario, according to George H. Barr, provincial dairying director. Toronto milk dealers have announced an advance in price of one cent a quart. John Carroll, of the Department of Agriculture, states that heavy crop losses may be the result from the most extreme spell in years.

VETERAN NEWSPAPERMAN

Edward H. MacKlin, president of Manitoba Free Press, who was honored at Winnipeg on the 50th anniversary of his entry into his profession.

Trans-Canada Telephone

Line From Halifax To Vancouver To Be In Operation Soon

Edmonton, Alberta.—Within two years a trans-Canada telephone line will be completed from Halifax to Vancouver, and Canadians will be able to talk from coast to coast over an all-Canadian wire, delegates to the ninth annual convention of the Telephone Association of Canada, were told during their five-day meeting at Jasper recently.

The line, it was explained, will cost \$10,000,000. Already it is possible to talk by telephone between the different provinces, but for conversation over a greater distance United States lines must be utilized.

Some 72 delegates from every telephone system in Canada attended the convention, and many phases of the telephone business were discussed.

Succeeding Hon. Vernon W. Smith, Minister of Railways and Telephones for Alberta, James Hamilton, general manager of the B. C. Telephone Company, Vancouver, was elected president of the association. Other officers chosen were: Vice-President, John E. Lowery, commissioner of the Manitoba Telephone System, Winnipeg; permanent secretary, A. M. Mitchell, auditor of the Alberta Government Telephones, Edmonton; St. John, New Brunswick, was selected as the association's convention city for 1930.

Infantile Paralysis In East

Quebec Schools Delay Opening On Account Of Outbreak

Quebec.—Due to the outbreak of infantile paralysis in this district, it was decided by the Protestant Board of School Commissioners to postpone the opening of schools until Sept. 18. Schools in this city generally open the first week in September.

Dr. Alphonse Lesard, director of the provincial hygiene department, announced that the department was not in a position to supply convalescent serum to combat the disease, but in the event of urgent need would endeavor to secure a supply.

Reduce Running Time

Canadian National To Consider Matter Of Increasing Speed From Montreal To Vancouver

Winnipeg, Man.—Immediate consideration is being given the matter of cutting the running time of Canadian National trains from Montreal to Vancouver in conformity with the proposed cut of 10 hours for transcontinental trains by the Canadian Pacific, as recently announced by President Beatty, according to a statement made by Sir Henry Thornton, K.B.E., president of the Canadian National Railway, just prior to his departure for Montreal.

The president who was accompanied by Lady Thornton, left on his special train for the East. This marks the conclusion of Sir Henry's annual tour of western lines, in the course of which he had, on one more occasion to note with admiration the optimism of Canadians in the west under trying circumstances.

He referred to the adverse crop conditions. While a national disaster had been narrowly averted, the morale of the westerner had not been affected. Nor had the faith of the Canadian National in the west, he added, stating that the plans for expansion which had been in progress would be continued while new ones were being considered.

Hon. R. B. Bennett In Ottawa

Returns To East After Five Weeks' Tour Of British Columbia

Ottawa, Ont.—Hon. R. B. Bennett, opposition leader in the House of Commons, returned to the capital from a five weeks' tour of British Columbia, in the course of which he delivered more than 60 addresses.

The Conservative chieftain returned more impressed than ever with the achievements and potentialities of the Pacific coast provinces. He said, however, the failure of the present government to provide adequate protection was imperiling the fruit growing districts, where, he said, the growers, unable to find home markets, were sending carloads of fruit to the United States on consignment—willing to take any price.

Returns From Arctic Trip

Steamer Beothic Back From Eight Thousand Mile Voyage

North Sydney, N.S.—The sealer "Beothic," back from eight thousand miles, and six weeks of threading the eastern archipelago of Canada's Arctic sea, arrived here recently. Scientists and the evidence of their discoveries in the north, welfare workers among the Eskimos, and members of the Canadian Mounted Police, back to civilization from their patrol of the world's loneliest sea, were on deck when the Department of the Interior's all-purpose supply boat docked here.

Among them is J. D. Soper, Canadian government naturalist, bringing with him to Ottawa the first blue goose ever seen by man.

In a few years malaria has reduced the population of the town of Birnagar from 80,000 to 2,300.

GOOD PROGRESS IS SHOWN IN GARNERING CROP

Ottawa.—Crop reports received from the three prairie provinces indicate excellent progress in the harvesting of the wheat crop. The bulletin issued by the Dominion Bureau of Statistics contains reports from the agriculture departments of Manitoba, Saskatchewan and Alberta. The crop is practically all cut in southern Manitoba, and threshing is about 50 per cent. done in that part of the province.

A few fields still stand in the north. Splendid progress has been made with harvesting in Saskatchewan. Ninety per cent. of the wheat has been cut in Alberta, 60 per cent. of the oats and barley, and harvesting weather has been very favorable. Light frosts in scattered districts have done no harm to the Alberta crop. Estimates of the yield vary.

In Manitoba, wheat averaging from five to 25 bushels is reported. The average in Saskatchewan is nine to ten bushels.

The report for Saskatchewan follows:

Splendid progress made with harvesting operations. Wheat cutting nearly completed and about 75 per cent. of straw grains.

From the Dominion experimental station, Swift Current: Thirty per cent. of threshing done; average nine to 10 bushels. Small amount of oats and barley threshed. Oat crop mostly will be used for seed feed. Yields poor.

Winnipeg.—Western Canada's farmers, spurring 'rest over the holiday week-end, sent marketing figures for Monday and Tuesday (Sept. 2 and 3), to a high total. Figures issued by Canadian two great railways showed that marketings for the two days reached a mark near 7,000,000 bushels.

On Canadian Pacific Railway lines 4,572,000 bushels were piled into bins ready for shipment, and Canadian National Railway points marketed 2,127,000 bushels. Storage at Vancouver and at the head of the lakes rose to 4,438,736 bushels and 58,020,000 bushels, respectively.

Storage in country elevators increased 756,000 bushels.

During the past four days grain has been moving through terminals east and west.

British Settlers For Coast Province

\$400,000,000 Is Received For Purpose Of Facilitating Plan

London, Eng.—The required sum of \$400,000,000 for the establishment of the Empire Development Corporation is assured, according to an assertion by Dr. C. T. Galbraith, in London newspapers recently—an assertion that is causing much rejoicing in official quarters. Dr. Galbraith is here in connection with the movement of settlers from the Old Country to British Columbia.

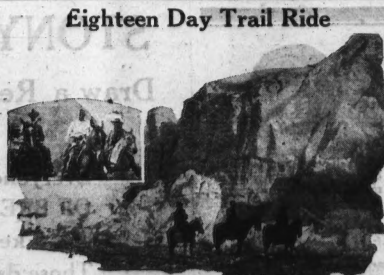

Dr. Galbraith says it is proposed that the corporation should acquire 20,000,000 acres in British Columbia and settle thereon 20,000 British families.

Premier Toineau has requested Mr. Thomas to send a representative to British Columbia," he declared, "and I am only willing the approval of the scheme by Premier MacDonald, Lord Passfield, Mr. Thomas and Premier Toineau."

"It is proposed that the governments of Britain and British Columbia should have representatives on advisory boards and that British and Canadian trade unions also will have representatives. Opportunities to co-operate would be offered to organizations carrying on empire settlement operations."

Grows Apples In Saskatchewan

Saskatoon, Sask.—Apples that compare favorably in size and taste with those grown in British Columbia, have been produced this year in Saskatchewan. George Pow, of this city, has a two-year-old tree that produces more than a good-looking Blush. Caville apples in his back yard.

Eighteen Day Trail Ride

The remote Columbia Ice Fields, north of Lake Louise, was the objective this year of the major Trail Ride of the season. These fields are claimed to be the largest body of ice south of the Arctic Circle, covering 200 square miles in area, whose waters flow in to three oceans. Only experienced trail riders are permitted to take this strenuous trip for which they must possess at least the silver button emblematic of 100 miles of trail riding. The trip from start to finish took eighteen days to complete. Picture shows two of the hardy trail riders, W. L. Payne, London, England, and Louis Prevost, of Montreal with Guy Thomas, Brewster's guide, on right, together with a section of the Columbia Ice Fields.

Here and There

Honorable George, aged ten, and Honorable John, aged 9, sons of Canada's ranching peer, Lord Rodger and descendants of a famous British Admiral, recently travelled 4,000 miles from Fort Saskatchewan, Alberta, to England, to enter a public school in the Old Country. They took the long journey unaccompanied, travelling on Canadian Pacific lines and by S.S. Montclair. C. P. R. officials looked after them on the long trip.

Mr. Hon. L. C. M. S. Amery, secretary for the Dominions in the Baldwin administration, who arrived in Canada on the Express of Australia recently travelled straight across the Dominion by Trans-Canada Limited, crack Canadian Pacific flyer, for Banff and Lake Louise whence he reached his objective and namesake 11,000-foot peak which he will climb.

Miss Georgia Englehard, daughter of a New York lawyer, is busy scaling peaks and establishing climbing records around Lake Louise. She climbed six peaks up to 12,000 feet in height around Lake O'Hara in one week. In addition to these exploits she has made a three weeks pack train trip.

Adding to an imposing list of winnings gained at leading exhibitions on the prairie circuit earlier in the season, the championship Holstein herd of the Canadian Pacific Railway supply at Strathmore Farm gathered ten firsts, five seconds, five thirds at the Vancouver Fair, made a clean sweep in the bull classes with junior and reserve senior championships in female classes and in group classes won first for exhibitors, first for young herd, first for progeny of cow, second in breeders herd and second in get of sire.

Judges of piping and dancing at the forthcoming Banff Highland Gathering and Scottish music festival to be held August 30, September 1 have been announced. They are, Colonel Alexander Fraser, Donald E. MacPherson, Murdoch McLeod, George Murray, all of Toronto; William Ferguson, of North Bay; Neil Sutherland, of Regina; and Alexander Halse of Medicine Hat. Coincident with the Festival, the Dominion Field and Track championships will be decided at Banff Labor Day.

Output of creamy butter in Saskatchewan for the first six months of the year is exactly 45% greater than for the similar period in 1928, according to a report of the dairy branch of the provincial department of Agriculture. In the first half of 1929 it was 4,128,044 as against 4,215,349 pounds in the first half of 1928.

The Canadian Pacific Railway will be represented at Fall Exhibitions in Eastern Canada this year at Toronto, Quebec, Sherbrooke, Saint John and Fredericton by models of the system's scenic, hotel, oriental and general details of the company's travel, express and telegraph activities. There will be a special building devoted to C. P. R. matters at the Toronto Exhibition, while activities dealing with other parts of the country will be shown at other cities. A number of special trains will be run to these exhibitions.

The Singing Fool

By HUBERT DAIL

Copyright, 1922, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, the singing waiter and song writer at Blackie Joe's New York night club, is discovered by Marcus, the famous Broadway review producer. Al insists on helping Molly, the ballad singer at Blackie's, because he loves her. Molly marries him, not loving him, and he pulls her up the ladder of fame. Meanwhile, Grace, the cigarette girl at Blackie's, who loved Al without his knowing it, is left behind. Molly discovers she is to have a baby. She resents this at first, but is reconciled after Junior arrives. But when she returns to the stage she loses interest in the child. Her romantic interest in John Perry, Al's best friend, is revived and one day Grace sees them riding in Molly's limousine. She also sees the man put his arm possessively about Molly.

CHAPTER XII

Night on Broadway. The richly dressed limousine crowds had left the theatres and were pouring into the fashionable night clubs. The electric signs on the night clubs blinked, beamed and beckoned. "Here," they seemed to say, "you play, find success, from care, here you may eat, drink and be merry until dawn—if you have the price!"

Brightest among those indiscreetly beckoning lights was the brilliant sign of the CLUB BOMBO, where Al Stone was part owner and master of ceremonies. What a contrast to the shabby old place where he had once worked—Blackie Joe's. Al often thought of it. And what a contrast between the job he now held and his old one. Once he had been a mere singing waiter, eager for the tips that the non too affluent patrons of Blackie's place threw him when they happened to like his comic songs and his ad lib wise-cracking. Now he was using his fame as Broadway's foremost song writer to pull the shekels into his pocket at the Club Bombo. He was the magnet, the favorite of the big-time crowds. They called him the "Singing Fool" because he could put his songs over with such emotional intensity.

The ballroom of Al's club was expensive and expansive, designed to hold the huge crowds that flocked there. The tables spread across the room an army of round white tops, with a small cleared space in the middle for the cabaret performers and for dancing. One of the best jazz orchestras in the land furnished music from a raised platform at one side.

Now as Al walked slowly up and down near the doorway, greasing new arrivals, the jazz boys were

sending out their plaintive, seductive strains and the floor was crowded with dancers.

The music died away, like a haunting cry echoing down a ravine, the lights went out and the couples left the floor. Then the spotlight picked up Al alone on the dance floor, and a roar of applause greeted him. He smiled happily and shook hands with himself—a symbolic gesture indicating that he was shaking hands with everyone.

"Ladies and gentlemen!"—his voice came clear and resonant—"we're all here and I want you to have a good time. Forget the concert charge and be happy. But before the show starts I want you to know a few of the celebrities we have present. Here's Dolores Costello, the famous motion picture star; here's Jack Barrymore, who needs no hush. At the right you will see Mayor Walker of our great city."

Finally Al's glance rested on a vacant table that was rather conspicuously placed. This was the special table that he always kept the reserved sign on, the table belonging to Molly and himself. Now he saw a couple stop before it and plead with the head-waiter to let them have it. He moved across the room quickly.

"Sorry, folks," he said, with polite regret, "but this table is always reserved. We'll find you one just as good—don't worry. Herman, see that the lady and gentleman are well seated."

Al gave the waiter a friendly clap on the shoulder and turned away. But when the couple had gone he glanced back toward the table, gazing at it with tender speculation. This was Molly's table and, in a moment, she would be here to occupy it. It must be held inviolate.

This table was somewhat different from the others; it was more tastefully arranged and the flowers on it had been specially selected and placed by Al himself. He was not quite satisfied with them, so he began to rearrange them, then forgetting his crowd entirely. Then he produced a jeweler's box from his inside coat pocket and slipped it under Molly's napkin. Attached to it was a card which read—"To my darling wife—on her anniversary and mine."

This done, Al looked up, smiling happily, and glanced at his watch. She should be here by now.

At that moment Molly and John Perry were comfortably ensconced in her blue limousine, proceeding with purposeful slowness toward the Club Bombo. Molly had told the chauffeur not to hurry.

She sat leaning against Perry's strong shoulder, while they conversed intimately in whispers. Perry was pleading, but Molly shook her head, although undecidedly.

"John, it's too complicated for me to solve. I love you, but—"

"But what?"

"Well, think of my position. Here I am, with all the money I can spend and all the public applause my nature craves. I'm sitting pretty, you can't deny that."

"I know all that. I've heard it a thousand times. But there's one thing you haven't got and that's important. You have no husband to love you whom you happen to love. Think it over."

Molly stared soberly straight before her, twining and untwining her small, white-gloved fingers.

"Are you falling in love with Al?" whispered the racketeer, bantering and sarcastically. "Do you like him more than me?"

Molly shrugged her shoulders impatiently. "We won't go into that—you know the truth. The point is, Al has put me over. I wouldn't be famous if it wasn't for him. I'm no sap—I know that. That's why I've stuck to him so long. If I quit him he'll turn on me and where will I be? Just a girl who will drift back into the unknown."

"Nonsense, Molly!" exclaimed Perry. "You're a star in your own right. Besides, is fame everything? Doesn't love count for something?"

"You bet it does!" cried Molly vehemently, and almost bitterly. "If I didn't think so I would never have let you come near me."

John Perry smiled. He knew the cool, calculating, ambitious Molly was mad about him. But he was mad about her, too. At first his interest had been the lightest of heart affairs, for he was a born philanderer, but gradually the situation had changed. To his own amazement a longing for Molly possessed him; now he found himself willing to dare anything to get her.

Suddenly she turned to him and said gravely, "What about my baby—what about Junior?"

But Perry had no answer to that; he merely shrugged his shoulders. He wanted Molly to himself, without any entanglements. Molly gave a tired smile and fixed her gaze on the broad back of the chauffeur, just ahead. How much did that man know of her interest in John?

Her unspoken words were cut short as Perry's arm went around her, and she felt herself drawn restlessly toward him. In the dark compartment of the limousine her lips were pressed hard against his mouth; his arms were around her like a vise. She forgot Al and John, forgot her ambitions, forgot everything but the passionate embrace of the man who held her. She released for a thrilling moment and smiled into the eyes only a few inches from her own. Then she pulled herself abruptly away, for the car was approaching the Club Bombo!

She quickly snatched a jeweled compact from her tiny bag, gazed at herself in the mirror, patted her disarranged hair back into shape. Her rouged lips had been smeared, so she seized Perry's handkerchief, gently wiping off the excess rouge. Meanwhile, the racketeer gazed at her in admiration and brushed her face powder from his top-coat lapel.

"You've mussed me terribly."

"Sorry," whispered the imperturbable Perry.

The chauffeur swung open the limousine door and Molly stepped out. Straight ahead she saw Al in the night club doorway, smiling at her expectantly.

(To Be Continued.)

The Oil Of The People—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

A Fruitful Cherry Tree

A cherry tree at Salem, Oregon, known to be over 70 years old, has produced 1,157 pounds of cherries this year, bringing a total of \$115.70. The tree is ten feet around the base and the body sound, according to R. E. Shinn, who has been caring for it.

An Amazing Project

Plan To Make Inland Sea In Sahara Is Feasible

Ancient prophecies may be fulfilled if a project declared feasible by engineers is carried out. It involves making a vast inland sea in the Sahara, and that would be accomplished by digging a canal which would begin about twenty-five miles from Biskra and run out to the Gulf of Gabes, in Algeria. It would be 210 yards wide, thirty-nine yards deep 170 miles long. It would connect the eight shotts (shallow saline lakes), that exist in that region, and would transform it into a vast interior sea having a surface of 14,000 square miles.

Ex-Kaiser Wilhelm is still the wealthiest German, his estate being estimated at 500,000,000 gold marks, approximately \$119,000,000.

Farm Incomes Higher

Average Increased By Seventy-Five Dollars In Year

The average cash income per farm home in the Province of Manitoba, Saskatchewan and Alberta last year was \$2,544, exclusive of the value of seed, feed, meat, vegetables and other commodities produced and retailed by the farmer for his own requirements. This is an increase of \$75 per home over the previous year.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain de-

parts. You are happy again in five minutes.

Don't depend on crude methods. Embody the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Stony Plain and District.

Mr and Mrs. Reg. Pilchard of Red Deer, were week-end visitors with Mr and Mrs Ben Loeder.

Paul Meredith is now convalescing at his home in Edmonton, after a month's stay in hospital, where he had been treated for an injury to his leg, received in an accident when his truck turned over.

Mr Hy Oppertshausen, the well-known hardware man, was receiving congratulations on Friday last, it being the 50th anniversary of his natal day.

Lyle Barrie, of Balcarres, Sask., arrived back in Stony on Saturday.

The new permanent night operator at the local station is J McGillies, of Jasper, vide Harry Coon, returned to Edmonton.

The postoffice at Edmonton Beach has been closed for the season.

A car of fruit arrived this week for the Hardwick Departmental Store.

Farmers having chickens to sell should bring these to P Henkel, phone 58.

inga Councilors meet next on Friday, Oct. 4, in Stony Plain.

Death of Mrs. Gellhohse

Her many friends will regret to hear of the death at Lamont hospital of the wife of Mr W E Gellhohse. After being taken to the hospital, following her accident in the elevator at Bruderheim on Aug 23d, it was thought probable that her life could be saved, but all efforts proved futile, and she passed away at 6 p.m. on Monday, Sept. 9th. The remains were taken to Stettler, where the funeral took place yesterday. A number of her friends from Stony and Edmonton motored down to be present at the obsequies.

United Church Notes.

What is expected to be one of the largest services ever held at Bright Bank will take place next Sunday, Sept. 15, when the Reformed Church choir of Mewassin will sing several selections. Singers from the Grove and Stony Plain will take part. The pastor of the Reform Church at Mewassin, Student W C Boehner, will be the special speaker.

Last Sunday a communion and a reception service was held at Holborn.

At Spruce Grove and Stony Plain the services continue to be well attended.

Church Services

A Lutheran service in English will be held in Stony Plain Sunday, Sept. 15, 7.30 p.m., by Rev. Osterman.

A farewell service will be held next Sunday, Sept. 15th, at the Lutheran church (Manitoba synod) at Golden Spike. Rev P Hauneman, who has been pastor of the church for the past four years, has accepted a call from the congregation at Bushaw.

Service at United church Sunday evening at 7.30: Rev G A Sauder.

Services will be held in St Philip's Church at 11 a.m. on Sunday, Sept. 22.

Sunday's Accident on Road.

An obstructed view at an intersection was the cause of another local auto accident; this one occurring at the Rosenthal school corner, on Sunday afternoon. When a Chandler sedan, driven by Mr Zeigler of Spruce Grove district, approached the intersection he was met by a Baby Grand truck driven by a resident of Stony Plain named August.

The Chandler sedan was rammed on the right side and overturned. Three passengers were with the driver, and these were unceremoniously dumped over on the road.

The truck escaped with a broken front wheel and axle; while the damage to the sedan had not been estimated at the time of writing.

Body Found North of Grove.

The body of Mr Rennie Sr. who had been missing from his home for several weeks, was found Saturday evening in the long grass about half a mile from his late residence. The discovery was made by the hired man of Mr Victor, a neighbor. Deceased was 63 years of age, and is survived by his wife and one son, Edward. The late Mr Rennie had been a resident of Spruce Grove district for the past 2 years, having come from Great Britain. A funeral service was held yesterday afternoon at the United church, with Rev G A Sauder officiating. Interment took place in Spruce Grove cemetery.

Golden Spike

Michael Singer passed away at the family residence in Edmonton, on Sunday last, Sept. 8th, at the age of 80 years. Deceased formerly farmed in the Golden Spike district. He leaves to mourn his loss his wife, four daughters and four sons—Mrs M Ursel, of Stony Plain district; Mrs B Shinbine, Mrs M Hennig, Mrs M Schultz; Philip, Valentine and Jacob, all of Edmonton; and John. A private service was held at his late residence, on Tuesday afternoon, followed by a service at 2.30 at St Peter's church, at which Rev Mr. Miller and Rev. Prof. Schwerman officiated. Interment was made in Beechmont cemetery.

The funeral took place on Sunday last of Mr Jacob Dimer Senior, in his 83d year. Deceased was an old and highly respected resident of Golden Spike district. He is survived by his wife.

Grove Farmer Operates a Combine Harvester

Owing to the short straw in the grain fields this season, farmers have been put to the inconvenience of adjusting themselves to the changed conditions. One of these was the enterprising local farmer Mr E C McLaughlin, who has been operating a combined harvester in his wheat and barley fields. Mr McLaughlin Jr. divested an ordinary binder of some of its parts and hitched on an extension canvas and a 7x7 foot box, the latter catching and holding the headed grain as it comes over the feeder canvases. The whole affair is drawn by a 15 30 tractor. The home-made outfit has given perfect satisfaction, but the operators found that the headed wheat gave far less trouble than the headed barley. This system of harvesting eliminates the need of binder twine and stooking. The oats are being cut the ordinary way.

Spruce Grove News

Shoemaker Schadeck has moved to Entwistle.

Thru the efforts of the Police, the auto plates stolen from Louie Javorsky have been recovered, and returned to the owner.

A prominent local farmer who was motoring to Edmonton in a hurry, for repairs to his binder last week, was held up on the Baseline by the Speed cops; and later was served with a summons.

Mr Mike Duholke is operating the Schram threshing outfit.

Mr H L Morrow has been under the doctor's care this week.

Lorenzo Eccles has commenced the erection of the new residence on his farm.

Geo Schwindt reports the loss of three windows and a door from the building formerly used as a church, on the Protestant cemetery on the Baseline east of town.

The choir from the Union church is going to Brightbank next Sunday afternoon, to take part in the musical service.

At the United church next Sunday morning Pastor Sauder will give another discourse in ten series of sermons based on the parables of Jesus.

Services will be held in the St Joseph church on Sunday, Sept. 22, at 9 a.m.

Contractor Carl Strass, who has been building the schoolhouse for Michael S.D. trustees, expects to have the building ready in a short time.

What Saith the Newspapers?

The following items from different newspapers appeared in a recent issue of Literary Digest—

Why call them flappers since they no longer wear anything that flaps?

It's on the bathing beaches that the ladies' costumes come nearest to the comic strip.

Even if you can't tell a mother and her daughter apart now, there is very little that you can't tell them together.

Well, it is easier to wash a pair of legs than wash a pair of stockings.

What hope is there for making women wear more cotton garments when their carolers won't even wear silk?
